PROFESSIONAL SUMMARY

Python Developer and ML Engineer with a 6-month internship at Appwars Technologies Pvt. Ltd. and 10+ live-deployed applications on Render. Skilled in building machine learning models, NLP pipelines, and computer vision systems using Python, Scikit-learn, TensorFlow, and OpenCV. Experienced in Flask, REST APIs, LangChain (GenAI), and data analytics using Power BI and Plotly. Available immediately for full-time Python Developer or ML Engineer roles in Delhi, Noida, and Gurgaon.

TECHNICAL SKILLS

Languages: Python, SQL

ML / AI: Scikit-learn, TensorFlow, Deep Learning, NLP (NLTK, TF-IDF), Computer Vision (OpenCV), LangChain (Basic)

Frameworks: Flask, Streamlit, FastAPI (Basic), Tkinter

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Excel

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Render

Concepts: REST APIs, OOP, Data Preprocessing, Feature Engineering, Model Evaluation, EDA, PDF Generation

WORK EXPERIENCE

Python Developer & ML Intern

Nov 2025 – Apr 2026

Appwars Technologies Pvt. Ltd.

Delhi NCR

- Built Python-based AI/ML applications including NLP models, computer vision tools, and analytics dashboards for live client projects.
- Developed and deployed Flask and Streamlit web apps for real-time predictions, automated reports, and data visualization.
- Created OCR pipelines and face recognition modules integrated into production client projects.
- Collaborated with senior engineers on REST API development, model training, and cloud deployment on Render.
- Completed end-to-end ML workflows: data collection, preprocessing, feature engineering, model training, and deployment.

PROJECTS

Spam Email & SMS Detector

Python | NLP | Scikit-learn | Streamlit | NLTK

Live: <https://e-mail-spam-detection-oh4b.onrender.com>

- Processed 5,500+ labeled messages using NLTK tokenization, stopword removal, and TF-IDF vectorization.
- Trained Logistic Regression, Naive Bayes, SVM, and Random Forest — achieved 98%+ accuracy.
- Deployed as live Streamlit app on Render with real-time predictions and performance charts.

Career Path Predictor

Python | Scikit-learn | Streamlit | Plotly | ReportLab

Live: <https://career-path-predictor.onrender.com>

- Built supervised ML model to recommend career paths based on skills, education, and user interests.
- Visualized education-to-career transitions for 20+ clusters using an interactive Sankey diagram.
- Deployed live on Render with real-time inputs and one-click PDF report generation.

HR Analytics Dashboard

Python | Streamlit | Power BI | OpenCV | Pandas

Live: <https://employees-dashboard.onrender.com>

- Built real-time KPI and attendance dashboard with automated alerts for 100+ employee records.
- Integrated OpenCV-based attendance capture and one-click PDF/CSV export for management reporting.

AI-Powered Healthcare Management System

Python | Flask | OpenCV | DeepFace | Tkinter | SQLite

- Built patient management system with face recognition login, AI symptom analyzer, and QR-code queue management.
- Automated billing and record management, reducing manual processing by an estimated 60%

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025

PDM University, Bahadurgarh, Haryana

CGPA: 7.77 / 10

Intermediate – Class XII (Commerce)

2021 – 2022

Government Co-Educational Secondary School, Delhi
